

Carpet Cleaning Services

Our professional and efficient carpet cleaning services will leave your property fresher, healthier and more hygienic. We are committed to providing a great service and we will treat your home as if it were our own.

Regular cleaning of your carpets will help maintain their appearance and extend their life whilst removing dirt, grime and dust. Our method of fresh water extraction combined with a specialist carpet cleaning solution provides a thorough deep clean at an affordable price.

Benefits of Carpet Cleaning

- Leaves carpets clean, soft and free of residue
- Reduces pollens and allergens
- Neutralise smells caused by cooking and damp
- Remove organic materials and dead skin cells
- Eliminate mould spores, dust mites and bacteria

Our Carpet Cleaning Process

- Carpets are vacuumed thoroughly in preparation for cleaning
- Heavily soiled areas and stains are pre-treated before the main solution is applied
- We use a water extraction machine to spray a mixture of water and solution on the carpet, which is then agitated and vacuumed with the cleaning wand. The majority of water is extracted to reduce drying times.
- We apply heated air to the carpet as we work to speed up the drying process to around 2-3 hours.
